

Connect with Tech

Make a difference today!

During this time of social distancing, many Pennsylvanians can't see or communicate with familiar people. This can be especially isolating for seniors and people with disabilities, who are out of reach of their usual caregivers, advocates, and service providers. TechOWL invites you to be part of the solution by donating new or gently used tablet devices!

Video chat technology lets individuals connect across distance!

Real-time video and audio calls:

- FaceTime (iOS devices)
- WhatsApp
- Zoom
- Skype

Video messaging:

- Marco Polo
- Glide

Alternative communication options let individuals make their needs known while experiencing respiratory symptoms or intubation.

Voice output through text-to-speech:

- Speak4Me
- Verbally (iOS)

Picture-based communication:

- Alexicom AAC
- Sono Flex Lite
- Sounding Board (iOS)
- Snap Core First (iOS, Windows 10) - multilingual
